

“I’ve heard of QuarkXPress,  
but isn’t it expensive?”

“It needs to be easy to  
use and most people here  
work part-time.”

**At Entec we understand the concerns of the charity sector. We work with customers just like you to find solutions to your ICT needs.**

QuarkXPress® software is available at a special reduced price to the charity market. It allows you to efficiently publish documents for print or the web, making it easy to create layouts for newsletters, annual reports, flyers, websites, and more.

### Industry standard publishing and design software

- QuarkXPress is the most commonly used package. More people are familiar with it than any other which means there is loads of help around.
- Many school, college and university leavers have QuarkXPress experience thus helping when recruiting.

### Easy to use for leaflet, document and flyer designs

- Bring design in-house to reduce costs of graphic agencies.
- Many people can contribute to create and modify handouts, newsletters and reports much more quickly.
- Reduce delays in producing printed materials.

### PDF export

- Create work and send straight through to your printers, post on your website or email to trustees, clients, or outworkers. PDF Export is built-in so you don’t even need to invest in tools like Adobe Acrobat.

### Web page designs

- Use the same tools, skills and content to create Web pages that you use for print.
- Change your web site when and how you want.
- Speedily create pages yourself for fund raising events or topical news features and information.

**Quark single box £130+VAT**
